PROJECT EXPERIENCE

Lattice Labs

Sacramento, CA

Lead Full Stack Developer

Oct 2025 - Present

- Lead developer for a HIPAA-compliant EHR system for ALEMS Senior Care using React, Spring Boot, Maven, MySQL, and AWS, implementing role-based access controls and data encryption to protect patient health information
- Hardened patient data access and reduced backend query volume by ~90% on the ALEMS senior care platform by implementing JWT authentication, AES encryption, and Argon2 hashing while refactoring N+1 query patterns into batched operations
- Configured and connected AWS RDS MySQL instances to the Spring Boot application, diagnosing and fixing connectivity and authentication errors during deployment
- Coordinated delivery across 8 developers by assigning tasks in Jira, reviewing pull requests, and maintaining clear communication with the client and advisor to ensure on-time feature completion

Persephone - AI Desktop Companion

Lead Developer

- Developed an AI desktop companion in Python simulating emotionally aware conversations through a psychology engine with 9 subsystems, dynamically adjusting tone and behavior based on user interactions patterns
- Fine-tuned a 14B parameter LLM with custom dataset and deployed locally through Ollama, eliminating cloud API dependency and achieving quick response generation with minimal delay
- Led a team of 4 developers to build and integrate a multi-platform system with a 2D avatar, voice TTS, and Discord bot, coordinating frontend, backend, and AI workflows to deliver a cohesive product

Car Maintenance & Repair Management Website

Lead Full Stack Developer

- Led a team of 8 developers to build a full-stack vehicle management platform using React.js, Spring Boot, and MySQL, handling the majority of development across frontend, backend, and database implementation
- Created all MySQL database tables for vehicles, maintenance records, and user accounts, configured AWS hosting, and established database connections to the Spring Boot application
- Integrated third-party vehicle API and developed REST endpoints to handle CRUD operations for maintenance tracking and service scheduling

EDUCATION & CERTIFICATIONS

California State University, Sacramento

Sacramento, CA

B.S in Computer Science

Graduation Date: May 2026

CERTIFICATIONS

CompTIA Security+

Google Technical Support Fundamentals

TECHNICAL SKILLS

IT & Systems: MySQL, schema design, Windows administration, Linux, Bash/Powershell, PC hardware, networking fundamentals

Programming: Java, JavaScript, Python, C#, HTML, CSS, MySQL, React, Node.js, Spring Boot, Maven, Flask, Expo

Developer Tools: Git, GitHub, Jira, IntelliJ, VS Code, Agile/Scrum, SDLC

WORK EXPERIENCE

Osaka Sushi

Sacramento, CA

Host/Busboy/Dishwasher

Jun 2017 - Jun 2024

- Delivered excellent guest experiences over 7 years by managing table assignments and coordinating take-out orders to ensure customer satisfaction during high-volume shifts
- Maintained efficient dining operations by supporting coworkers and handling multiple responsibilities simultaneously including bussing, dishwashing, and floor organization to keep service running smoothly during peak hours
