WORK EXPERIENCE

California Franchise Tax Board

Sacramento, CA

Student Assistant, Enterprise Quality Assurance

Jul 2026 – Present

- Conduct system, regression, integration, functional, and end-to-end testing across the SDLC for enterprise case management and audit applications, authoring and executing test scripts
- Validate Secure Audit Logging in Splunk (SIEM), confirming user actions generate expected events with accurate timestamps, user IDs, and field values
- Query Microsoft SQL Server to verify case records reflect the expected results of application transactions
- Perform root cause analysis on failed tests to isolate environment and test-data issues from application defects
- Verify Change Orders, Support Requests, and Information Requests against documentation and master test scripts, logging defects in Azure DevOps with reproduction steps, evidence, and severity
- Participate in weekly status meetings across cross-functional teams and attend defect triage and deployment meetings with developers, analysts, product owners, and vendors

Osaka Sushi

Sacramento, CA

Host/Busboy/Dishwasher

Jun 2017 – Jun 2024

- Managed seating, take-out orders, and table turnover during high-volume shifts, adapting between roles to keep service running smoothly

PROJECT EXPERIENCE

Lattice Labs

Sacramento, CA

Lead Full Stack Developer

Oct 2025 – May 2026

- Led development of a HIPAA-compliant EHR system for ALEMS Senior Care using React, Spring Boot, MySQL, and AWS
- Secured patient health information across every user role by implementing role-based access control, JWT authentication, AES encryption, and Argon2 hashing to meet HIPAA requirements
- Resolved deployment-blocking connectivity and authentication errors by configuring and debugging AWS RDS MySQL instances against the Spring Boot backend
- Delivered features on schedule across an 8-developer Agile team by running sprints in Jira, reviewing pull requests, and managing client and advisor communication

Persephone – AI Desktop Companion

March 2026

Lead Developer

- Enabled emotionally adaptive conversations by building a 9-subsystem psychology engine in Python that adjusts tone and behavior to user interaction patterns
- Eliminated cloud API dependency and kept user data on-device by fine-tuning a 14B-parameter LLM on a custom dataset and deploying it locally via Ollama
- Shipped a multi-platform product (2D avatar, voice TTS, Discord bot) by leading 4 developers across frontend, backend, and AI workstreams

EDUCATION & CERTIFICATIONS

California State University, Sacramento

May 2026

B.S. in Computer Science

Cosumnes River College

Aug 2026 – Present

A.S. in Cybersecurity and Information Assurance

CompTIA Security+

March 2026

TECHNICAL SKILLS

QA & Testing: System, regression, integration, and end-to-end testing; test scripts; defect tracking; root cause analysis

Security: Splunk (SIEM), Secure Audit Logging, RBAC, JWT authentication, AES encryption, Argon2 hashing, HIPAA

Languages & Frameworks: Java, Python, JavaScript, React, Spring Boot

Databases: Microsoft SQL Server, MySQL, SQL query writing, schema design

Tools & Platforms: Azure DevOps, Jira, Git, SharePoint, AWS (RDS), Ollama, Windows, Linux, Bash/PowerShell, Excel
